The 3 DAF XF 106 530 models arrived at Bonham drive pre mounted with their respective 1,2,3 registrations earlier in September. Delivered directly from CHANNEL COMMERCIALS, all are fully loaded including roof spotlights, air horns and full tread plate cat walks.

Prior to being “Let loose” on the roads, all three were subjected to the new JBS livery, tracker installation and DVS compliancy kits to fully optimize their usage.

Being the last of the “old style” XF models, we are confident that any teething and settling in issues will be minimized. This is the ideal starting point for our relationship with DAF

Part of the JBS ethos is to look after its core staff. In this case, 3 members of our driving team when asked “What would you like to drive”, elected the DAF XF as their preferred steed.

and with an additional 6 trucks due for delivery in 2023 this is very important. Early indications are proving positive!

In addition, we are currently running the demo DAF XG+ from channels. Driver Aaron Tomsett reports “It’s the best truck I have ever driven”!

“I’ve always driven DAF trucks, in my mind nothing beats them”

- Mick Cundall (JBS Advanced Driver)
