PR 06

Spot the differences!?!?! Our new Renault trucks are stunning in appearance and performance!

MORE MODERNISING FOR JBS HAULAGE!!

February has been a very busy month

JB51DAZ - High T 520

It's a long, committing, and thought-provoking process!! Yes, choosing new trucks may seem like a rather luxurious dilemma. BUT, with so much on offer from so many HGV manufacturers it really can take a lot of time to make the right decision.

Well, for JBS Haulage its easy. We don't believe in the "Eggs in 1 basket" philosophy. No no, we have spread our eggs between the best on offer. February has seen no fewer than 5 new 2023 models hit the road.

Yes, private number plates. Are the just cool? Or do they serve a purpose. We believe they do, and for the fortunate few drivers who's name can be abbreviated, well its just all the better!

Y15JBS - Actros L JB51GAV - High T 520 JB51CAN - S500 Super

Spread over 3 manufacturers, we have picked the best for our future and the good news. There is still more to come. The below are here though and are already pounding the tarmac sporting their JBS plates.

Mercedes Actros L - Driver Extent model (Y15JBS)

Renault Trucks - High T 520 - (JB51DAZ)

Renault Trucks - High T 520 -(JB51GAV)

Scania S500 - Super (JB51CAN)

Scania S500 - Super (JB55CAN)

Repair and Maintenance contract?? Yes or NO?!?!?

- John Jennings

Most new Trucks today will come with an R&M contact between 5 & 7 years. So why not use it?! JBS have for the first time put no fewer that 6 of our new fleet onto R&M with their respective main dealers. But why?!

Well. Put simply, its benefit to the economical running of the fleet and the additional value that remains on the truck after its initial 7 year life span! JBS are confident that the right decision has been made and look forward to strengthening relationships with our local main dealer partners and well as the relatively stress free running of the new fleet additions.
